

NPI TN 01.10 NPI 02	NPI - Calor Lite™ propane cylinders	Relates to BSS Check(s) Advice
<u>Background</u> <p>Examiners may be aware of range of lightweight propane cylinders called Calor Lite™ are available from about 800 stockists according to the Calor Lite website.</p>		
<u>Description / Scenario</u> <p>Launched in March 2008, Calor confirmed that the Calor Lite™ cylinders are suitable for any application where a standard 6kg propane cylinder may be used.</p> <p>The product may attract boaters because the full cylinders are just over 4kg lighter than the equivalent current standard Calor unit. (The empty cylinder is around half the weight of the standard version).</p> <p>The cylinders also come with a contents gauge although very early batches were supplied without the gauge.</p> <p>The cylinder is made of lightweight steel and manufactured to EN 14140.</p> <p>The Calor Lite™ cylinder is designed to be exchanged in the same way as standard Calor LPG cylinders and thus refilled under controlled conditions and subject to routine testing.</p>		
<u>Implications for BSS examinations</u> <p>There are no specific implications for examiners and Calor Lite™ cylinders are acceptable.</p> <p>Do not confuse this product with user re-fillable LPG bottles discovered without the 80% 'stop-fill' facility as reported in BSS Examiner News 06 – 006 and which if found the BSS Office should be contacted urgently.</p>
