

Notes	Screen-shots and pointers
<p>By The Way</p> <p>If you have previously logged into the V5 Sandbox, depending on the settings on your internet browser, you may find the V5trail sandbox username has automatically appeared in the standard login</p> <p>CHECK THE END OF THE USERNAME AND DELETE .V5TRAIL IF IT HAS APPEARED IN THE SALESFORCE LIVE USERNAME BOX</p>	
<p>Just a short reminder – look out for help buttons.</p> <p>If the help button doesn't help, call Phil or rob or ask your question here https://pro.boatsafetyscheme.com/th-e-kiosk/bss-business-clinic/ask-your-question</p>	
<p>EXAMINATION RECORDING MUST START FROM A BOAT PROFILE PAGE</p> <p>To start an examination you must first find your boat.</p> <p>To find the boat you examined, try using the Advanced search. It is more effective.</p>	
<p>Search tips</p> <p>An asterisk is known as a wildcard</p> <p>The wild card can go at the front, the back or at both ends e.g. *fish* will find words with <i>fish</i> at the front, at the back or in the middle. <i>Fishface</i>, <i>Catfish</i> or <i>Kingfisher</i>.</p> <p>It also works with numbers too, *345* will find 12345, or 34567, or 23456.</p>	

This is what a search might show.
 We wanted Fortestpurposesonly III
 We used Fortestpurposes*, this term
 found 13 boats.

Before you start, did you check to see if, or did you insert, the correct number of berths is in the boat details 'Berths' field?

If you want to make an Appliance Record, the 'Berths' field must have an [accurate] number in it.

The ventilation calculation (650x no. of berths) uses this value in the boat profile automatically.

Boat Detail [Edit](#)

Boat Details

BSS Ref. No. _____ Dangerous Boat

Photo

Boat Construction Details

Boat Name [fortestpurposes](#) Arkfudge

Former Name

Year of Manufacture 2009

CIN/HIN GB-AFBB1

Length (mtrs) 11.00

Beam (mtrs) 2.1

Berths 3

Hull Material wood

Hull colour Black

Superstructure Material wood

Engine Fuel diesel

Engine Type inboard

Engine make & model Bamford

Number of Engines 1

Engine Rating 30

NOTE THIS
 The Appliance Record ventilation calculation relies on the boat field 'Berths' being complete

Don't try launching an examination off the examination tab. The only route is to find the intended boat first.

Use the 'Create New Examination' button on the boat page.
